

IBM NALAYATHIRAN

DOMAIN-IOT

ASSIGNMENT 2

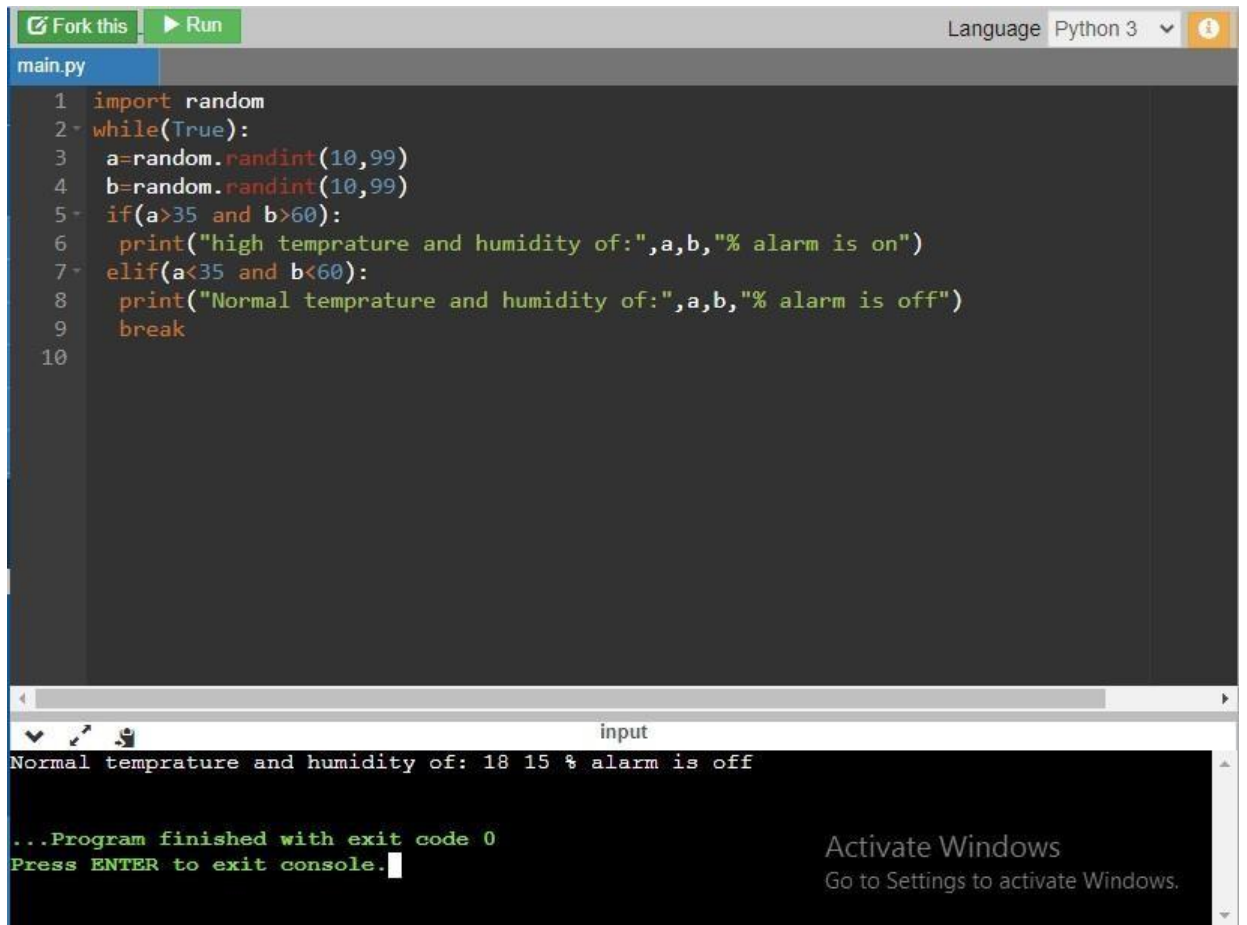

*TEMPERATURE AND HUMIDITY SENSING AND ALARM AUTOMATION USING
PYTHON*

*MANOJKUMAR.V
PNT2022TMID04058*

CODE:

```
import random
while(True):
    a=random.randint(10,99)
    b=random.randint(10,99)
    if(a>35 and b>60):
        print("high temprature and humidity of:",a,b,"% alarm is on")
    elif(a<35 and b<60):
        print("Normal temprature and humidity of:",a,b,"% alarm is off")
    break
```

OUTPUT:

The screenshot shows a web-based Python IDE interface. At the top, there are buttons for 'Fork this' and 'Run', and a language selector set to 'Python 3'. The code editor displays a file named 'main.py' with the following Python code:

```
1 import random
2 while(True):
3     a=random.randint(10,99)
4     b=random.randint(10,99)
5     if(a>35 and b>60):
6         print("high temprature and humidity of:",a,b,"% alarm is on")
7     elif(a<35 and b<60):
8         print("Normal temprature and humidity of:",a,b,"% alarm is off")
9         break
10
```

Below the code editor is a terminal window. The output of the program is visible:

```
Normal temprature and humidity of: 18 15 % alarm is off

...Program finished with exit code 0
Press ENTER to exit console.
```

On the right side of the terminal, there is a watermark that says 'Activate Windows Go to Settings to activate Windows.'
